

AACE Certificates for Institutions

Stronger Teams. Better Care. Healthier Futures.

Why Institutions Choose AACE

AACE helps institutions strengthen and standardize diabetes care through high-quality, evidence-based certificate programs that scale education across care teams. By building consistent practice and internal expertise, these programs support improved quality, safety, and patient outcomes across care settings.

Benefits for Your Institution

- **Enhanced Specialty Team Capacity:** Build the knowledge and confidence of your care team to manage diabetes across the continuum of care.
- **Improved Care Coordination:** Promote consistent, evidence-based approaches that strengthen communication and transitions of care.
- **Reduced Diabetes-Related Readmissions & ED Utilization:** Better education and management lead to fewer acute events and lower overall costs.
- **Improved Quality & Patient Outcomes:** Support evidence-based practice that drives better clinical and patient-centered outcomes.
- **Scalable Workforce Development with Measurable ROI:** Leverage discounted per-learner pricing to educate more team members and maximize your investment.

AACE Certificate Programs

- **Fundamentals of Diabetes Technology:** Build foundational knowledge and skills to confidently integrate diabetes technology into practice and improve patient care.
- **Inpatient Diabetes:** Strengthen hospital-based diabetes management to improve outcomes, reduce complications, and support transitions of care.

How Institutions Get Started

Most organizations begin with one certificate program and a defined group of clinicians, then expand across departments and care teams over time.
