

# **AAACE Strategic Roundtable on Multidisciplinary Approaches for the Management of MASLD and MASH**

Next Steps for Manuscript Development and Dissemination

# Manuscript Structure – The Six-Part Framework

## *Next Steps for Manuscript Development and Dissemination*

1

### Executive Summary and Rationale

- Define clinical gap
- Describe expert panel
- State objectives

2

### Methodology and Governance

- Describe process
- Include disclosures
- State sponsorship

3

### Core Findings by Theme

- Consensus areas
- Divergence areas
- Evidence summary

4

### Visual Aids and Clinical Frameworks

- Diagnostic pathways
- Comparison tables
- Key takeaways
- Risk algorithms

5

### Call to Action Items

Segmented by stakeholders:

- Clinicians
- Researchers
- Policymakers
- Patients

6

### Implementation and Impact Measurement

- Measure change
- Follow-up plan
- Importance

# Session Purpose and Manuscript Vision

## AACE Strategic Roundtable on Multidisciplinary Approaches for the Management of MASLD and MASH

- The roundtable has generated consensus themes, identified key action items, and clarified areas of agreement and divergence.
- The manuscript will translate these findings into a peer-reviewed, practice-facing publication designed for knowledge dissemination and professional advocacy.
- Purpose: Provide AACE members, PCPs, endocrinologists, hepatologists, and cardiologists with actionable guidance on MASLD/MASH detection, risk stratification, multidisciplinary care, and treatment.
